## BIKE RACK 167

Bike rack made out in combination of high-performance concrete and metal. Two materials that combine strength and stability. The concrete is reinforced and fiber strengthened. The aggregate structure contains natural marble or granite stones. They can be combined in different colors and are of a specific size. The concrete surface is embossed and further treated with a protective coating. This makes the product even more resistant to aggressive weather conditions and reduces deposition of dirt. The metal structure is electrogalvanized and powder coated. These tech ...
