CONCRETE BENCH 232

2,189.00 €

The bench is made of high-performance reinforced fiber concrete and polished natural aggregate. The structural marble and granite stones are natural and with different color combinations. The concrete bench is combined with certified bamboo hardwood. Additional treatment of the polished surface with a protective coating makes the product even more resistant to aggressive weather conditions and reduces the deposition of dirt. The bench is a modern decoration for the urban exterior (for parks, alleys, public spaces, playgrounds and gardens). The specially selected exotic wood brings the "close to nature" feeling. A new design solution that relies on the proportion and balance between two different materials.
